

Mini-project peer assessment

**Please sit according to your group number:
Group 1 at the front, Group 35 at the back.**

**Even groups use the left aisle;
odd groups go right.**

Before we start, there are a couple of announcements.

Before we start, there are a couple of announcements.

- Presentation labs will run as normal today and tomorrow.
We will look at how to get maths onto a webpage.

Before we start, there are a couple of announcements.

- Presentation labs will run as normal today and tomorrow. We will look at how to get maths onto a webpage.
- We will try to get marked mini-projects back to you as soon as possible.

About the peer assessment

About the peer assessment

You will be sat in a group with other people who have read the same projects as you.

Your task

In a moment we will begin. You should

- introduce yourself to your group;
- sign the attendance sheet, ready to be collected;
- start the discussion.

At the end of the discussion you will agree on a mark for each of the projects and fill in the attached marksheet.

Your task

In a moment we will begin. You should

- introduce yourself to your group;
- sign the attendance sheet, ready to be collected;
- start the discussion.

At the end of the discussion you will agree on a mark for each of the projects and fill in the attached marksheet. You should keep any comments polite and constructive, as they will be returned to the author.

Your task

In a moment we will begin. You should

- introduce yourself to your group;
- sign the attendance sheet, ready to be collected;
- start the discussion.

At the end of the discussion you will agree on a mark for each of the projects and fill in the attached marksheet. You should keep any comments polite and constructive, as they will be returned to the author.

(As a rough guide to marking, 0 should mean 'not submitted' and 4 should mean 'exceptionally good'.)

Some things you might discuss are below.

Some things you might discuss are below.

- Which project(s) did you like the best?

Some things you might discuss are below.

- Which project(s) did you like the best?
- How well written and explained was the Python code?
Did it work?

Some things you might discuss are below.

- Which project(s) did you like the best?
- How well written and explained was the Python code?
Did it work?
- How well was the project extended?

Some things you might discuss are below.

- Which project(s) did you like the best?
- How well written and explained was the Python code?
Did it work?
- How well was the project extended?
- Did the author use \LaTeX well?

Some things you might discuss are below.

- Which project(s) did you like the best?
- How well written and explained was the Python code?
Did it work?
- How well was the project extended?
- Did the author use \LaTeX well? (Look out for 'overfull hboxes', text in math-mode etc.)

Some things you might discuss are below.

- Which project(s) did you like the best?
- How well written and explained was the Python code?
Did it work?
- How well was the project extended?
- Did the author use \LaTeX well? (Look out for 'overfull hboxes', text in math-mode etc.)
- Was the writing fluent and free from spelling mistakes?

Some things you might discuss are below.
