

MAS115 Mathematical Investigation Skills: Semester 1 mini-project

Alex Fletcher

School of Mathematics and Statistics, University of Sheffield

Autumn 2021/22

Mini-project peer assessment

**Please sit according to your group number:
Group 1 at the front, Group 20 at the back.**

**Even groups, look to the left;
odd groups go right.**

Before we start, there are a couple of announcements.

Before we start, there are a couple of announcements.

- ▶ Presentation labs will run as normal today.

Before we start, there are a couple of announcements.

- ▶ Presentation labs will run as normal today.
- ▶ We will try to get marked mini-projects back to you as soon as possible.

About the peer assessment

About the peer assessment

You will be sat in a group with other people who have read the same projects as you.

About the peer assessment

You will be sat in a group with other people who have read the same projects as you.

Each group will have a folder containing:

About the peer assessment

You will be sat in a group with other people who have read the same projects as you.

Each group will have a folder containing:

- ▶ an attendance sheet;
- ▶ a copy of each project you were asked to mark, with a marksheet.

Your task

Your task

In a moment we will begin.

Your task

In a moment we will begin.

You should:

Your task

In a moment we will begin.

You should:

- ▶ introduce yourself to your group;

Your task

In a moment we will begin.

You should:

- ▶ introduce yourself to your group;
- ▶ sign the attendance sheet, ready to be collected;

Your task

In a moment we will begin.

You should:

- ▶ introduce yourself to your group;
- ▶ sign the attendance sheet, ready to be collected;
- ▶ start the discussion.

Your task

In a moment we will begin.

You should:

- ▶ introduce yourself to your group;
- ▶ sign the attendance sheet, ready to be collected;
- ▶ start the discussion.

At the end of the discussion you will agree on a mark for each of the projects and fill in the attached marksheet.

Your task

In a moment we will begin.

You should:

- ▶ introduce yourself to your group;
- ▶ sign the attendance sheet, ready to be collected;
- ▶ start the discussion.

At the end of the discussion you will agree on a mark for each of the projects and fill in the attached marksheet.

You should keep any comments **polite** and **constructive**, as they will be returned to the author.

Your task

In a moment we will begin.

You should:

- ▶ introduce yourself to your group;
- ▶ sign the attendance sheet, ready to be collected;
- ▶ start the discussion.

At the end of the discussion you will agree on a mark for each of the projects and fill in the attached marksheet.

You should keep any comments **polite** and **constructive**, as they will be returned to the author.

(As a rough guide to marking, 0 should mean 'not submitted' and 4 should mean 'exceptionally good'.)

Some things you might discuss are below.

Some things you might discuss are below.

- ▶ Which project(s) did you like the best?

Some things you might discuss are below.

- ▶ Which project(s) did you like the best?
- ▶ How well written and explained was the Python code? Did it work?

Some things you might discuss are below.

- ▶ Which project(s) did you like the best?
- ▶ How well written and explained was the Python code? Did it work?
- ▶ How well was the project extended?

Some things you might discuss are below.

- ▶ Which project(s) did you like the best?
- ▶ How well written and explained was the Python code? Did it work?
- ▶ How well was the project extended?
- ▶ Did the author use \LaTeX well?

Some things you might discuss are below.

- ▶ Which project(s) did you like the best?
- ▶ How well written and explained was the Python code? Did it work?
- ▶ How well was the project extended?
- ▶ Did the author use \LaTeX well? (Look out for 'overfull hboxes', text in math-mode etc.)

Some things you might discuss are below.

- ▶ Which project(s) did you like the best?
- ▶ How well written and explained was the Python code? Did it work?
- ▶ How well was the project extended?
- ▶ Did the author use \LaTeX well? (Look out for 'overfull hboxes', text in math-mode etc.)
- ▶ Was the writing fluent and free from spelling mistakes?

Some things you might discuss are below.

- ▶ Which project(s) did you like the best?
- ▶ How well written and explained was the Python code? Did it work?
- ▶ How well was the project extended?
- ▶ Did the author use \LaTeX well? (Look out for 'overfull hboxes', text in math-mode etc.)
- ▶ Was the writing fluent and free from spelling mistakes?
- ▶ Perhaps use **PMI**:

Some things you might discuss are below.

- ▶ Which project(s) did you like the best?

Start with general discussion. Half-way through, I will encourage you to start filling in the marksheets if you haven't already. You can annotate the project behind the marksheet, or leave the copies you annotated as homework.

Time to start!

Finishing up

Finishing up

Now that the task is complete, please make sure you have:

Finishing up

Now that the task is complete, please make sure you have:

- ▶ filled in the marksheet for each project you received (and given 0 for any not submitted);

Finishing up

Now that the task is complete, please make sure you have:

- ▶ filled in the marksheet for each project you received (and given 0 for any not submitted);
- ▶ left behind any annotated copies you would like to return to the author;

Finishing up

Now that the task is complete, please make sure you have:

- ▶ filled in the marksheet for each project you received (and given 0 for any not submitted);
- ▶ left behind any annotated copies you would like to return to the author;
- ▶ put all of the above back into your group's folder **in increasing registration number order, lowest first.**

Finishing up
